### **Water System Break Advisory**

A large number of homes in the City of Belleville are experiencing disruptions in the water service due to a Break on the 24 inch water main.

The water main break occurred on Sidney Street at Graham Street. City crews are currently on the scene working to repair the break; water service for a large number of households and businesses in the surrounding area have been disrupted. Disrupted areas include Elgin, Tripp, Pepper, Faraday Streets and Lake Court. At the time of this Media Release this area has no water. City crews are working to restore limited service to this area. This should be completed by noon today. Since the water pressure and supply in this area will be lower than normally experienced a Boil Water Order is being issued by the Ministry of Health. Only homes or businesses in the affected area are required to boil water before use or use bottled water until further notice. City crews are working to fix the break as soon as possible.

The Boil Water Order will remain in place until further notice.

To reemphasize for affected residents, the water main break may reduce water pressure and supply in some areas. Belleville Water is requesting that all residence on the water system conserve water and reduce water use until further notice.

For information, contact Belleville Fire department at 613-962-2010. For general information or further information contact the city of Belleville web site [www.city.belleville.on.ca](http://www.city.belleville.on.ca)
